Dear Professor Imanishi,

I am now preparing the texts of our Paris Symposium for printing. Unfortunately, you gave me only a very short paper. Could you write further developments? I would need 20-30 pages more if you like. Our European colleagues were deeply interested hearing what you said ; it is a pity the language difficulty is so severe and the time so short. So, I would be pleased to have a detailed paper, and I hope firmly you will be able to send it to me in the following weeks.

I send you two questions you were asked by Zajonc and Etienne. Could you answer on a separate sheet?

With many thanks and sincerely yours.

Prof. Rémy CHAUVIN

QUESTIONS SE RAPPORTANT A L'EXPOSE DE MONSIEUR LE PROFESSEUR IMANISHI

Q. 1: posée par M. ZAJONC

Are there visible sign of characteristic and unique structures which are maintained in a group of monkeys that are independant of the individual members ?

Q. 2 : posée par Melle ETIENNE

Which way the dominant male behave towards young males in the center of area ? Is he very dominant and repressive so that or positive identification with him is hindered ?
